NEW COURTYARD CRYPTS IN \$2M EXPANSION OF ENFIELD MAUSOLEUM

Construction of a \$2 million expansion of the mausoleum at Enfield Memorial Park is underway.

The development is designed to meet growing community demand for above ground burial and will include 184 new crypts in an outdoor courtyard precinct adjacent to the existing Enfield Mausoleum.

"The Enfield Mausoleum is a prestigious building in a unique setting, and has met the cultural needs of Adelaide's Italian community very well," Chief Executive Officer, Robert Pitt said.

"The Courtyard Gardens expansion features sandstone walls, elegant entrance gates and landscaping to create a contemplative serene space. The existing mausoleum car park area is being reconfigured to form an entry plaza and hearse driveway."

Two four-level high crypt modules will be built and landscaped pathways and gardens will provide ample room for large gatherings, as well as areas for prayer and contemplation.

Single and companion crypts will be offered in each module each with a 99 year lease. Public toilet facilities have been incorporated into the gateway design and will be accessible to all cemetery visitors.

Robert said the expansion would complement the existing Enfield Mausoleum; the centrepiece of the Memorial Park's new mausoleum Precinct.

The development was designed by Greenway Architects in consultation with [Milne Construction Company](#) and forms stage one of a master plan providing flexibility for future growth. The construction contract was won by Coombes Barei.

"I'm pleased to say that the project is on schedule and on budget and we're on track for completion of construction in September," Robert said.

"Our operations team will then install landscaping elements and plants, ready for an official opening in November.

"We've recently announced the sale of crypts off-the-plan, and community interest in the new development is strong."
